15B. CONTRACTOR/OFFEROR	15C. DATE SIGNED	16B. UNITED STATES OF AMERICA	16C. DATE SIGNED
(Signature of person authorized to sign)		(Signature of Contracting Officer)	2012 01 18

This Amendment is issued to reopen, extend the closing date and to provide additional specification requirements.

The above referenced Request for Quotation (RFQ) is amended as follows:

Reopen and extend the closing to 01/27/12.

As referenced on the original RFQ this requirement is for Brand Name or Equal product. Competition is highly encouraged.

Included in the original specification for a Smart Lab Resolution XRD System, the Naval Research Laboratory (NRL) is requesting that the system have simple operations of switching from one mode to another. Requires minimum mounting and dismounting of components and auto-realignment. Auto-realignment is needed to eliminate manual alignment. To avoid powder spillage in the instrument a horizontal sample stage is required. Because of power and space limitation, the unit must use power of 208 V, 20 A and have a footprint smaller than 5' wide x 6' deep including the water recirculator.

Any additional questions must be forward to SolQnA@nrl.navy.mil by 01/23/12.

All other terms and conditions will remain the same.
